

Using the VIBE Framework to Enhance Shared Decision-Making and Health Equity for Patients and their Caregivers

Views

- Whose view is being considered?
- Whose view is being centered?

Inclusion

- Whose voice has been included thus far?
- Are those potentially impacted the most by this decision involved in the decision-making in some way?

Benefits and burdens

- Who will benefit most from this decision?
- What harm may be done by this decision?
- Who will carry the burden of this decision?

Equity

- Will this decision lead to an equitable situation for the patient?
- Will this decision create or exacerbate any inequities that will need to be addressed later?
