

# Beneficial Effects of Finerenone:

## FINEARTS-HF

Among patients with HF and mildly reduced or preserved ejection fraction, finerenone resulted in a significantly lower rate of a composite of total worsening heart failure events and death from cardiovascular causes vs placebo.

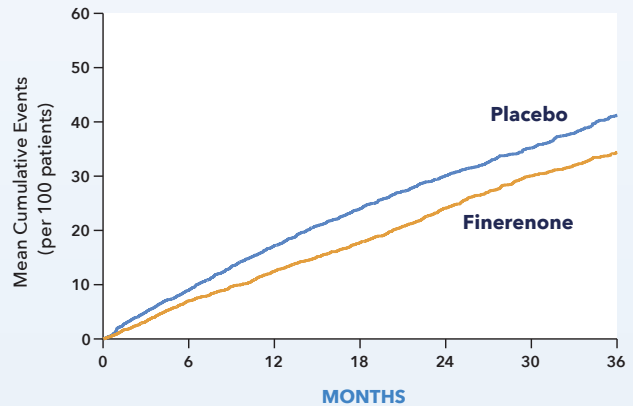

### FINEARTS-HF

**Panel A** shows the cumulative-incidence plot for the composite of total worsening heart failure events and death from cardiovascular causes (the primary outcome). **Panel B** shows the cumulative-incidence plot for total worsening heart failure events. **Panel C** shows the Kaplan–Meier plot for death from cardiovascular causes. The inset shows the same data on an enlarged y axis. **Panel D** shows the Kaplan–Meier plot for the composite of the first worsening heart failure event or death from cardiovascular causes.

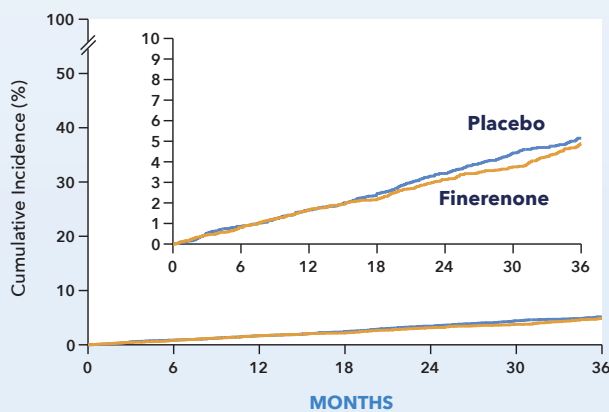

**a** Total Worsening Heart Failure Events and Death from Cardiovascular Causes

**b** Total Worsening Heart Failure Events

**c** Death from Cardiovascular Causes

**d** First Worsening Heart Failure Event or Death from Cardiovascular Causes
